## Customer Reviews

A must for anyone working with Ob patients. Especially helpfull if you have never worked in OB. I recommend it to all students, and practitioners.

I received this product in great condition and in a timely manner. I would definitely use this seller again.

Linda delivered five of my six children. The quiet humility and confidence she displayed during delivery, made childbirth, for me, an extremely positive and spiritually uplifting experience. She speaks not from a place of simple observance, but an honest experience in which she has shared with her patients and THEIR experiences. This is one remarkable lady and I always wondered when

she'd write a book about Midwifery. Linda has an incredible gift and I am one of the lucky beneficiaries of that gift. This is a definite "must read", but especially wonderful for those of us who have experienced Linda's professionalism, intuition and knowledge of the woman in labor and after. Such a beautiful soul and I am forever grateful to have known her professional skills at all, as well as her personal touches that have reached into the landscape of my life over the years and inspired me to grow as a human being. My children are nearly grown now, but her contribution is never, EVER forgotten.

This is a good resource to keep near throughout the day. Not a pocket guide (too large to fit in a pocket), but a good desk guide. I used it as a supplement to Pocket Varneys and Sinclair's Midwives Handbook. This book also has good pt education tools and good bullet points to spark a tired midwife's memory :-)

I am only on page 75, but I am enjoying this book immensely. It's an easy read, full of practical information that you can apply immediately. It's a great review for WHNP students, as well. I feel much more confident starting my OB rotation. This will definitely be in my labcoat.

This book is full of pearls and essential facts to guide the thinking of the beginning clinician. I have found it invaluable. It is clear and easy to understand and remember. I hope the author publishes something similar for intrapartum care.
