Customer Reviews

PopOut is the unique, genuinely pocket-sized map which features our patented PopOut fold. It is this innovative design that allows our precise, easy to follow cartography to be right in your hand when you need it most. Moreover, the origami fold means you can do away with that awkward, over-sized map, making it a compact and discreet reference tool that doesn't shout "tourist"

alert'!PopOut was founded in 1993. Having spotted a need to cure what he calls 'Map Stress Syndrome' after watching numerous tourists around the City of Bath, England, battling with oversized maps, founder Derek Dacey recalled the invaluable miniature charts he used during his days as a commercial pilot. Aiming to bring this level of usability to the city map market, a small team of designers was recruited to realise what would soon become the PopOut. 1993 saw the release of the first ever PopOut Map Bath, which was sold in the gift and souvenir trade across the city. Hot on the heels of this initial success, a research trip to the USA culminated in a redesigned layout, combining strong photo images, high quality printing and laminated covers â “ standards which are still adhered to today. That research trip also saw the birth of the first US destinations covered in the PopOut range â “ Boston, NYC, Philadelphia and Washington DC. Launched in the new style in the US they enjoyed instant success in the gift and souvenir trade. Today, PopOut produces over 100 titles for major destinations and is loved by travellers the world over.

It isn't the most comprehensive map I've seen. We ended up not using this map at all.
Disappointing.

Good little map to give you a general idea as to where things are, doesn't list the street names thou.
It's also just for Central Tokyo

A lot of information crammed into a conveniently sized map. Highly recommend.

Handy but I thought map would be larger. But like that information if current.

The map is small, durable, and convenient to carry around. It has pretty good details and has a lot of the more popular sites marked on the map, however, it only gives a general area of sites and there are no street names on the map to help with exact location. There is also a small map of the Tokyo Subway, but I believe it is only of the subway and not helpful for the JR train stations which we used the most. I bought a couple maps for my trip and out of all of them this one was really the only one that was helpful, but at my own expense I used Google Maps a lot more frequently. I would still recommend this map to anyone looking to visit Tokyo
