Customer Reviews

The perfect companion volume for Hale-Bopp watchers, this guide explores the fabulous mysteries above, from planets in our solar system to the constellations in both the Northern and Southern hemispheres, stars, galaxies (including the Milky Way), nebulae, astronomical bodies, objects, phenomena, and -- yes -- comets. Night Sky provides a concise guided tour of the heavens with 48 monthly sky charts of the northern sky and 88 constellation charts, each offering a detailed map of individual constellations. Essays on the universe, the solar system, and constellations introduce the reader to the wonders of the sky.

The author, Mark R. Chartrand III, is the former chairman of the Hayden Planetarium and executive director of the National Space Institute.

This book was listed as required for my astronomy lab but not really necessary. Still when I found it for such a good price I couldn't just pass it by. This would be something I could use when out and about in the wilderness..... or on long cross country drives. Now just to get that telescope I've always wanted.

Must have astronomy guide book for beginners and professionals alike. Great!

Difficult to use for a beginner, although as w/ any Audubon Field Guide, it is well put together and probably a great guide for someone that has more knowledge and experience as star-gazer than I do!

Great New condition in wrapper. Purchased for my dad, who loves astronomy and science.

I have learned so much from the Night Sky field guide, it has a wealth of information on everything in the sky. I'm looking forward to clear skies so I can start to find constellations and planets.

Our oldest son, in 4th grade now, has always loved these guides. The pictures and information are engaging. He loves to flip through them, and share them with his younger brother. Good for all ages, and would make a great gift.

We live in a rural area, so this book has come in nicely in identifying the stars. Everyone should have one. nice feel, small size, great photos and descriptions.

Got the book right on time. The cover of the book was blue but it is all the same and it was in great condition.
