Fetal And Perinatal Skeletal Dysplasias: An Atlas Of Multimodality Imaging

Synopsis

Skeletal dysplasias are rare, they may be genetic, sporadic or environmentally determined conditions, affecting bone and cartilage growth and development. The genetic mutations continue to exert their influence throughout the life of the affected individual. This unique, full colour atlas features 132 conditions with 2300 images of over 500 patients. It brings together the wide-ranging clinical disciplines involved in pre and postnatal care and diagnosis and presents perinatal images of rare skeletal disorders to include skeletal dysplasias and malformation syndromes on a case-by-case basis. It presents the most up-to-date information on the individual conditions to include the mode of inheritance (autosomal dominant or recessive, or non-genetic), the Mendelian Inheritance in Man number (MIM) for further reference reading, the locus (the chromosome number and position on the affected chromosome), the mutated gene and the affected protein. Each condition has a brief summary including synonyms, incidence, genetics, age at presentation, clinical, prenatal ultrasound and postnatal radiological features, bone histology, prognosis and differential diagnosis. Images are presented with each case illustrating different imaging modalities and with gross and/or histopathology findings. Brief clinical findings are also given where available. It is of great value to all clinicians and technicians working in fetal medicine and neonatal care. It greatly assists in diagnostic accuracy and provides clinicians and affected families with the information needed to make informed management decisions.

Book Information

Hardcover: 696 pages

Publisher: CRC Press; 1 edition (September 30, 2012)

Language: English

ISBN-10: 1846194881

ISBN-13: 978-1846194887

Product Dimensions: 1.5 x 6.8 x 9.8 inches

Shipping Weight: 4.3 pounds (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars 2 customer reviews

Customer Reviews

Christine M Hall, Amaka C Offiah, Francesca Forzano, Mario Lituania, Michelle Fink and Deborah Krakow respectively Consultant Paediatric Radiologist (retired, Great Ormond Street Hospital for Children, Emeritus Professor of Paediatric Radiology, Institute of Child Health, University of Londo; Clinical Research Fellow, Institute of Child Health, Great Ormond Street Hospital; Consultant Clinical Geneticist, Galliera Hospital, Genoa; Director, Fetal and Perinatal Medicine Unit, Galliera Hospital, Genoa; Paediatric Radiologist, Royal Children's Hospital and the Royal Women's Hospital Fetal Medicine Unit, Melbourne; Obstetrician-Gynecologist, Maternal-Fetal Medicine Specialist and Medical Geneticist, University of California at Los Angeles

FANTASTIC book. A wonderful complement to the only few books on the subject.

Brilliant book.
