Up Here: The North At The Center Of The World

Synopsis

The North is a complex place that is beautiful, moody, and anything but untouched. The Arctic, part of the international North that is pivotal to the world because of climate change, is no longer a frontier of the past. The same interest in the North that preoccupied artists and explorers of the Romantic era has returned greater than ever, but rather than merely depicting its grandeur, today's artists, scientists, and explorers question the future of the landscape. *Up Here* connects art, science, and environment at a time when unprecedented climate change requires unprecedented innovation. The contributors explore the ideas of "wilderness" and "remoteness," the lessons to be learned from cold places and indigenous knowledge, and how the Arctic is a signal for global change.

Piece of junk. This author has a career of writing useless junk. If you still want this book, instead of paying a lot of money now, wait a year or so and then pay a couple bucks if you are still interested. Why pay 40 bucks now? This book is a waste, only an articulation of how useless Alaska art authoring/ criticism is. This author wrote another big impressive book entitled *Icebreakers* that had sold for a lot of money-- recently a copy was available for 2 bucks-- I kept the 2 bucks.
