Customer Reviews

I have been an elementary teacher for over 20 years and wish I had had this book for my teaching! It is a great resource whether you are teaching children with or without an extra chromosome. It has wonderful worksheets in the back that are fun! I look forward to using it for our little guy who is genetically enhanced! :-)

Thanks Patricia for an awesome, inspiring book.

Very well written and prepared

Did not receive the book pictured!

This book contains the very best program for teaching reading to moderate/severe children. I used it in my classroom and then bought 3 other copies to give to some teachers that I know.

I purchased two copies of this book to use in a tutoring program for individuals with Down Syndrome. They are excellent resource material for the tutors during the training sessions, and are always available to refer back to for added, or refresher information, or simply for new ideas for creating teaching materials.

This is a wonderful book. I am homeschooling my son and I need this kind of help for me to be able to help him. I am thankful that well written books are out there to help our special kids.

sent me the wrong book - did not receive the one that I ordered.

This book will be a great resource for teaching my student with Down Syndrome
