FRENCH'S INDEX OF DIFFERENTIAL DIAGNOSIS 13E

Synopsis

The first edition of French's Index, published over 80 years ago, aimed to help the clinician in the differential diagnosis of any condition encountered in any medical specialty or surgery, that may be seen in general or hospital practice. For this 13th edition that aim remains the same. Completely revised, with new editors, new contributors and new illustrations, French's Index is as essential for today's doctors as it has been for those of previous generations. The earliest possible diagnosis of a patient's disease is desirable, and it is important for the physician to be able to differentiate between the various diseases to which the presenting symptoms may be due. In this respect, French's Index has no parallel. Arranged alphabetically and based on the symptoms with which patients present to the physician, it offers a succinct and well-illustrated aide-memoire which will be invaluable to the undergraduate in the clinical years and to trainee and established doctors in general and hospital practice. Completely revised, with new editors, new contributors and new illustrations, French's Index is as essential for today's doctors as it has been for those of previous generations.

A fitting tribute to its first author. *British Medical Journal* This is an amazing book... For general practice this can be a real gem, providing information which may not be easily found or quickly accessible in a general textbook. This book still has a lot to offer and hopefully will continue to produce offspring for future generations of doctors. [Medix Website](#)

excellent

For those who group pathologies by symptoms.

I had used this text 25 years ago and found the differential diagnoses helpful. In reviewing the updated revised text, it does not seem as complete as needed for today's medicine. There appear to be better resources available.

Still a very useful book like its predecessor since the 1920's! Would be better with expansion on the basic mechanisms and scientific basis of each symptom or sign.

I purchased this item for my wife because she made me. I guess I did not want to sleep on the couch or floor. I have no idea what's inside this item. She enjoyed using this item to study.
