## Customer Reviews

This book is really well done. I have only used it for Joe's Valley and Little Cottonwood Canyon, and it was easy to use. Future guide book authors should take note of the format. The descriptions are great, they include how to get there but also include a description of the start holds which is very handy for reassuring yourself you are on the right problem. All the boulders are drawn with very few pictures which would seem like a negative but the attention to detail is amazing. Spatially the boulders are oriented perfectly and all the necessary aretes and corners are drawn in to help you find the boulder you are looking for. Great job, well done.

ARE YOU KIDDING ME SELLER?!?!----DON'T SPEND MORE THAN \$30 ON THIS BOOK----This book was maybe \$25 when I bought it new, and now people are charging over \$100?!Wow. Do not mistake this book for the Bouldering Guide To Utah(aka the "Black Bible" to folks around here) That book(bouldering guide to utah) is the actual valuable guide book with more areas and problems around Utah.This guide book does an OK job at directing you around boulders here in Utah. Topos for Big Bend, Joe's Valley and Ogden(haven't visited Ibex yet) are all for the most part correct. There

are a few missing problems and areas in LCC, mostly, it's incorrect info on approaches. If you're interested in this guide book, I have 2 copies that I could sell for loads cheaper, and I also believe that about 80% of the climbing stores here still carry that book. If you're ever in the area, I can give you beta for FREE, as will all of the other friendly local climbers

I am not from the Utah area so buying the guidebook really helped out. It had good descriptions and you could easily find the problems marked in the book. Our trip to Joe's Valley and the Moab area was just awesome!
