Customer Reviews

For a how to this is not the book you want. If you want to see all types of stuff from different artists then this is okay. No much on how, just this is what this and that guy does. Okay

So late getting this done. It was a nice book.

If you are interested in pinstripping, go get this book!!! I'm just starting in the field, but this book contains excelent information, nice step by step tutorials, and great pictures. Maybe it doesn't have too much patterns, but who cares? if you understand the technics, you have to start pushing yourself in making some designs on your own.

It was as advertised, and delivered fast.
