Customer Reviews

"A beautifully written and illustrated text on cosmetic laser surgery loaded with practical advice and data on the wide variety of lasers and their individual uses." --Journal of the American Association of Forensic Dentists, July 1999

Cosmetic Laser Surgery: A Practitioner's Guide is the definitive textbook of laser-assisted dermatologic and plastic surgery. Extensively revised and greatly expanded, this new edition provides a highly visual overview of the state of the art in cosmetic laser surgery, as well as thoroughly updated guidelines for matching lasers with procedures. Clearly written and user-friendly, Cosmetic Laser Surgery: A Practitioner's Guide features over 300 color photographs illustrating operative techniques and the results of different procedures. Topics covered include: * CO2 laser resurfacing * Erbium: YAG laser resurfacing * CO2 laser blepharoplasty * Endoscopic laser browlift * Laser-assisted uvulopalatoplasty * Laser hair transplantation and removal * Laser treatment of scars, stretch marks, telangiectasias, pigmented lesions, and tattoos Cosmetic Laser Surgery: A Practitioner's Guide is an indispensable reference for dermatologists, plastic surgeons, and

otolaryngologists. From reviews of the First Edition: "This book fills the void between new technology and practical application for many practitioners of cosmetic laser surgery. Each chapter is well-written, with many excellent clinical photographs. The material presented obviously represents substantial clinical experience. Clinical discussions are pertinent, concise, and practical and will be very useful both for the new practitioner of cosmetic surgery and, as a reference, for the experienced practitioner."-The American Journal of Cosmetic Surgery. "The book is oriented towards the practicing physician, with emphasis on indications and procedural details. Any dermatologist interested in starting an aesthetic laser surgery practice will find this book a worthwhile investment."-Archives of Dermatology.
