Customer Reviews

"This is a perfect book for an aspiring bird nerd" -- Ithaca Child "Brimming with 175 photographs and numerous tips for novice birdwatchers, this comprehensive but compact field guide offers basic information about birds. In fact, it provides all that is needed to begin the hobby of birding other than binoculars and a notebook." -- Literacy Worldwide.

Julie Beer is a freelance writer based in the San Francisco Bay Area. She's a longstanding researcher for National Geographic magazines and a regular contributor to NG books, including the NG Kids Encyclopedia of the United States and the Weird But True series. From the Hardcover Library Binding edition.

This is a wonderful book. My 8 year old loves it and has used it several times. She liked the format with questions and answers, and tips and, jokes. The jokes were carried to school as well. Thank you for an easy to use fun reference.

Got this and a pair of binoculars for a five year old's birthday gift. She loved it! Her parents sent me messages of her using the book several times to identify birds and explore nature.

Thought this was going to be more like for young children learning about birds but the print and pics seem like they are more for an older child.

My son adores this book. He is now staring out the window regularly trying to find/identify birds. It's typical for NG, fun, colorful, easy to read, etc. Just the right amount of info!

Got this for my daughter's hiking pack and she loves it. It is small enough to fit in her small pack and not very heavy.

We love feeding the birds in our yard and learning about them. Great book for kids!

The book is organized well by bird types, large enough picture representations of birds for both children and older adults eyes to see. It will provide hours of fun for my nephew and his grandmother in their new bird watching venture. Perfect to engage children to read and outside in the air and sunshine away from electronics! :)

5 year old bird lover looks at this every day, he loves it.
