Learn In Your Car: Spanish, Level 2

Synopsis

The Learn in Your Car language series is the first system ever designed to teach a language in your car...or anywhere...without a textbook. Simple and effective, you can learn to converse in another language while driving, walking, or doing tasks around the house. And now with Learn in Your Car, you can turn your PC, your Rio, or any mobile device into your own personal language tutor. Each course is organized the way you learn best - by learning words and phrases - and building these into sentences and clear conversations. Arrange hotel accommodations, order in restaurants, change money, and feel more at home next time you travel! The Learn in Your Car language series is: Easy to use without a textbook Prepared by dialect-free professionals Available in levels for students of all abilities Designed to teach grammar basics through recorded examples Level 1 offers an introduction to key words, numbers, phrases, sentence structure, and basic grammar. Level 2 teaches more challenging vocabulary, additional grammar, and targeted sentences designed to generate confidence in your ability to comprehend and converse. Level 3 presents expanded vocabulary, advanced grammar, and more detailed sentences to extend your conversational skills.

Customer Reviews

I returned it a refund, but only because it was used and the guidebook didn't come with it. At level two I really need the guidebook. With the guidebook I would be raving fabulous things about this product. I was so impressed with level one.

Program is easy to follow and covers one topic at a time. It starts each section with very short sentences and then ends with a couple of more complicated ones. You need to have some

background or refer to the reference book occasionally to understand the use of the different tenses but is a great way to learn and improve your Spanish

Didn't like this at all.....too fast pace and didn't learn the Spanish phrases very well.

I have been looking for this for years and I found it!

This was a great CD . I enjoyed learning from it and also purchased one as a gift for a friend. I would recommend it.

Great teaching method, says the words and phrases twice so as to get the association for a more enhanced learning, have tried others before, this one ranks above the others at a reasonable price..

Read my comments along with my review of Level Three. This is a fine format, just right for an intermediate student and suitable for advanced review as well.

I'm a third of the way through Level 2 and am just starting to be able to construct/speak with useful sentences and understand very basic Spanish if they talk slow. My reading is much better. I do not enjoy a natural talent for languages - especially in listening comprehension. I have tried all sorts of media aids, including interactive CD ROMS and several tapes and books. First off I think it is necessary to learn a language by engaging as many of the faculties of your mind as possible so I do not subscribe to this or any CD as the sole means of learning the language. Most people will need to do a lot of reading, memorization, listen to Spanish TV shows/movies, writing exercises and if they are lucky some interaction with Spanish speaking people. Find a good text book as the backbone of your studies. Also you will not learn the language in 30 days with this or any other aid - think in terms of months and years depending on how well you want to know the language. Probably 6-12 months and 6 hours a week for a very basic but functional level of conversational skill. So I recommend a good book, something fun and not too academic - for example: Asi Es by Nancy Levy-Konesky, Karren Daggett (this also includes an audio CD - but it is completely inadequate. They have additional audio available but it is difficult to find and is expensive - it was meant for school language labs). For a supplement to the main structure of your course work these CDs are the best audio aid I have come across, particularly assuming that this work will be done in your car where you will not be able to look at a book. The CD is not a massive vocabulary dump without

sufficient practice in gramatical structure (such as The Complete Idiots Guide to Learning Spanish on Your Own), rather it slowly builds vocabulary as it trains you to compose simple phrases and sentences, not by gramatical rules, by example. Nor does it have any superfluous introductions to each lesson,! "amusing" anecdotes or explanations that will drive you absolutely nuts when you have to play the CD tracks repeatedly to learn the Spanish - another fault of the Idiots Guide. The recordings are done in a studio with good pronunciation so you can clearly hear the words.It comes with a small book which has the printed dialogue and very succinct explanation of the grammar as it is introduced. You will only need to refer to it occasionally. The Spanish and English are on seperate tracks so you can alternately test your listening comprehension and speaking by turning down the left or right speaker.The 3 levels of the course will give you all the basic elements of the language so it is indeed a reasonably comprehensive audio course in basic Spanish. The total vocabulary is limited but you will pick up many more words in a text you should buy and will get lots of practice from these CDs putting together properly structured sentences. It can only help to listen to lother audio aids (Idiot's Guide tape does have lots of vocabulary) to add variety of structure, accents and rhythm, but I recommend this as the main audio learning tool.Note: Level 2 begins with the Preterite tense, Level 1 ended with a brief intro to the preterite. You should buy Level 2 and 3 at the same time because at this point you may need to skip between Levels to use the material that complements a text you may also be using.
