Inside Your Outside: All About The Human Body (Cat In The Hat's Learning Library)

Synopsis

The Cat in the Hat takes Sally and Dick for a ride through the human body where they visit the right and left sides of the brain, meet the Feletons from far off Fadin (when they stand in the sun you can see through their skin), scuba dive through the blood system, follow food and water through the digestive tract, and a whole lot more!

Book Information

Age Range: 4 - 8 years

Grade Level: Preschool - 3

Customer Reviews

PreSchool-K--This installment in the series appears at first glance to be a useful overview of the human body. However, while the text flows in a pleasant Seuss-like way and the colorful artwork will please fans of The Cat in the Hat, some of the information is just plain wrong. For example, the statement that there are "soft bones in your nose" is incorrect; the nose is actually made up of cartilage. In another section, the text asserts that "in our stomachs there's food we ate three days ago." Food generally passes through the stomach in a matter of hours; it may take days to eliminate from the body, but the stomach empties relatively quickly. The heart is described as the biggest muscle in the body, but the gluteus maximus is actually the largest. For a better treatment of the subject for beginning readers, try Shelley Rotner and Stephen Calcagnino's The Body Book

(Orchard, 2000) or Barbara Seuling's From Head to Toe (Holiday, 2002).--Christine A. Moesch, Buffalo & Erie County Public Library, NY Copyright © Reed Business Information, a division of Reed Elsevier Inc. All rights reserved.

Young children will love Inside Your Outside! ...a good choice for teachers looking to integrate reading and science. -- National Science Teachers Association Recommends

very nice book..I love it...We are excited to use such a nice book. Thank you for sending a excellent book.

Packed with tons of great information and great pictures. Great learning tool for our little ones! The rhyming and the layout flow nicely and our kids are into it.

My child (4) really enjoys this book, and started retaining information from it after the very first read! It is a whimsical read that is very educational and fun. We have quite a few of these books in our home, so I'm sure this will not be the last I buy.

Both my 5 yo and 3 yo love this book!

Perfect to read to my 6 year old. Too hard for him to read but the rhymes are so fun I enjoy reading it to and with him. Simple facts for a beginning lesson in the human body.

My 4 year old son and 2 year old daughter both really enjoy this book. They recently have become interested in things inside your body. My son especially loves seeing the pictures of skeletons. All the pictures are drawn though, no real xrays in this book.

This is a good book to show your curious kids how the body works, and what's inside. It is an easy read, and my 3 and 5 year old both love it. It's written in typical Dr. Seuss fashion, and has bright illustrations.

My son is very into learning about the human body at 3, so we got this book as a recommendation from a friend. It's a winner! It's fun for the younger ones and gives great things to discuss with them. And it has so much information for them to also grow into. They did a great job with this book and

covered, the heart, senses, ear, digestive system, muscles, skin..... My son asks to read it everyday. The Oh the skin your in DVD is great too, we rented from the library.
